CleverCOAT

CleverCOAT

nanoFormula

eco-smart

CleverCOAT for Car Glass is developed for car glass, mirrors and car lights.
Product is polymer included nanoparticles' composition. It creates transparent water- and dirt repellent coating.
The treated glass is self-cleaned – raindrops rolls out from surface involving the dirt and glass becomes clear when driving speed is 60km/h and more. CleverCOAT increases a safety of a driving.
Treated glass develops an ability to self-clean from organic contaminants when exposed to sunlight.
The volume in bottles is enough to treat glasses of middle car at least 8 times. Low consumption and long effect allow reduce efforts and quantity of the car cleaning products.
Duration of the protective effect is up to 2 months and depends from vehicle operation.
When protective effect decreases, it is enough to reapply the product. The product is not included a water and can be applied in any season.

CleverCOAT is not contained a soluble matter. The rest of product after applied is hardened. Inert solid matter is created. It can be utilized with nonoffensive solid waste.

CleverCOAT for Car Interior is effective and clever product for car salons, interiors and dashboards. . Product is polymer included nanoparticles' composition. It cleans, protects, polishes and renews looks of plastic, metal and rubber elements. Product is suitable for cars of any age, user friendly. It is easy coated, polished and is touching up minor scratches. Dirt particles have a weak adhesion are removed from the surface without using detergents. Don't apply the product to textile! To cover a subcompact car, about a 15 minutes time is required.
A strong protective coating is created which prevents microbial fouling and hazardous UV exposure. Treated surfaces are rendered to brand new shining interior parts. Protected surfaces are easy carried in perfect condition with wet cloth without chemicals. The volume in bottles is enough to treat middle car interior 8 times. Low consumption and long effect allow reduce efforts and quantity of the car cleaning products. Duration of the protective effect is up to 4 months.
When protective effect decreases, it is enough to reapply the product.
The product is not contained a soluble matter. The rest of product after applied is hardened. Inert solid matter is created. It can be utilized nonoffensive with solid waste.

CleverCOAT for Car Exterior is effective and clever product for car salons, interiors and dashboards. . Product is polymer included nanoparticles' composition. It cleans, protects, polishes and renews looks of plastic, metal and rubber elements. Product is suitable for cars of any age, user friendly. It is easy coated, polished and is touching up minor scratches. Dirt particles have a weak adhesion are removed from the surface without using detergents. Don't apply the product to textile! The product is not contained a soluble matter. The rest of product after applied is hardened. Inert solid matter is created. It can be utilized nonoffensive with solid waste.

Nanoformula Plane Cloth and Nanoformula terry cloth 30 x 30cm set approved for CleverCLEAN and CleverCOAT products. Microfiber cloths made from 20% polyamide and 80% polyester.
Nanoformula.Terrycloth is special to distribute and remove nanoFormula liquid excess. Good absorbent of moisture. The terrycloth has enough thickness so that when working don't scratch coated surface (if without over zeal). The ultrafine microfibers, quantity of ones in hundred timed more quantity usual fibers, get to microfiber, covered ones by liquid very good. Also when removing liquid excess by terrycloth, results are an excellent.
Nanoformula Plain Cloth is special for finishing treatment (polishing) of the surfaces with using our coatings. No piles and stains left. Ultrafine microfibers, whose quantities are hundreds of times higher than the quantity of other materials, permeate micro irregularities of the surface thus polishing thereof.
Reusable (when using with our nanoFormula products fouled with the cloth- to be disposed together with solid waste). Can be applied for other household purposes. Resistant to about 400 washing cycles. Used dirty Cloths to be disposed with solid waste.

CleverCLEAN
CleverCOAT

Nano protective car polish products CleverCOAT for car glass,car exterior and car interior.

Universal all season car valeting products CleverCOAT set based on nanotechnology.

CleverCOAT for car – reliable protection, cheap and efficiently

Product is packed in a convenient plastic bag, where you will find:

100g bottle with CleverCOAT for car glass
100g bottle with CleverCOAT for car exterior
100g bottle with CleverCOAT car interior<
Two 30cm x 30cm cloths set: terry and polish

CleverCLEAN

CleverCLEAN

nanoFormula

easy to clean coatings

CleverCLEAN for Window is developed for glass and windows care, however it is not detergent. Product is liquid polymer included nanoparticles composition. A polymer fills all microscopic scratches and fractures of a glass. It improves optical properties and adds a shine. Surfaces obtain water and dirt repellent properties when applied. Treated glass develops an ability to self-clean from organic contaminants when exposed to sunlight. In additionally the rain droplets, when rolling off, take dirt particles with them ("lotus effect") and clean a surface. Protective coating simplifies a cleaning (no need to wash them so frequently).

Product is applied to windows, display cases, greenhouses made from glass or transparent plastics and it can be also used on window frames, sub sills and so on. It can be used at any season. Small consumption and prolonged protective effect (up to 6 months) reduce cost for household cleaning about in 5 times and downsize polluting of your home and surrounding environment by chemicals at least in 40 times. When protective effect decreases, it is enough to reapply the product. Easy to clean product CleverCLEAN justifies its name: windows are protected from quick dinginess after washing, thus cleaning of windows can be carried out more rarely, more effective and without any chemical cleaning detergents. The product is not included a water and can be applied in any season. Easy to clean product CleverCLEAN justifies its name: cleaning becomes rarer, cleanliness can be achieved with minimal time, without using chemical and abrasive cleaners.

CleverCLEAN for Kitchen is designed for cleaning and kitchen's taking care however it is not a detergent. Product is liquid polymer included nanoparticles composition. Surfaces obtain water and dirt repellent properties after treatment with CleverCLEAN. It also forestalls for the food be burnt to the stove hotplate. Product can be effectively used for protecting kitchen furniture, refrigerators, air cleaners and working surfaces made from glass, wood, plastic, ceramics and metal. Do not apply to cookware. The dirt is easily removed from protected surface by dry or moistened with water cloth used usually for tiding up.

As the product has small consumption and treated surface develops prolonged protective effect (starting from 2 weeks) it allows reducing cost for household cleaning about in 5 times and downsizes polluting of your home and surrounding environment by chemicals at least in 40 times if compared with traditional cleaners and detergents. When protective effect decreases, it is enough to reapply the product. Easy to clean CleverCLEAN product justifies its name: treated surfaces can be very easily cleaned and turned into original appearance and shine without any scrapers and abrasive chemicals; the bacteria and infections cannot spread on the protected surface. Easy to clean product CleverCLEAN justifies its name: cleaning becomes rarer, cleanliness can be achieved with minimal time, without using chemical and abrasive cleaners. For the most part it is enough to wipe surface with cloth. Composition of product is inert and contains no volatile matter.

CleverCLEAN for Home Interior is designed for cleaning and kitchen's taking care however it is not a detergent. Product is liquid polymer included nanoparticles composition. Surfaces obtain water and dirt repellent properties after treatment with CleverCLEAN. It also forestalls for the food be burnt to the stove hotplate. Product can be effectively used for protecting kitchen furniture, refrigerators, air cleaners and working surfaces made from glass, wood, plastic, ceramics and metal. Do not apply to cookware. The dirt is easily removed from protected surface by dry or moistened with water cloth used usually for tiding up. As the product has small consumption and treated surface develops prolonged protective effect (starting from 2 weeks) it allows reducing cost for household cleaning about in 5 times and downsizes polluting of your home and surrounding environment by chemicals at least in 40 times if compared with traditional cleaners and detergents. When protective effect decreases, it is enough to reapply the product. Easy to clean CleverCLEAN product justifies its name: treated surfaces can be very easily cleaned and turned into original appearance and shine without any scrapers and abrasive chemicals; the bacteria and infections cannot spread on the protected surface. Easy to clean product CleverCLEAN justifies its name: cleaning becomes rarer, cleanliness can be achieved with minimal time, without using chemical and abrasive cleaners. For the most part it is enough to wipe surface with cloth. Composition of product is inert and contains no volatile matter.

CleverCLEAN for Sanitaryware is developed for bathroom and toilet care, however it is not detergent. Product is included nanoparticles' composition polymer, it forms optically transparent nano layer which helps to protect sanitary ware and ceramics from getting dirty. It impedes contagion, improves general hygiene in bathroom and toilet. Surfaces obtain water and dirt repellent properties. They have got prevention for salt spots. The product applies for facing tile and ceramic's sanitary ware equipment, chromium-plated steel, other metal, plastic and glass.

Product may be used for shower stalls and shower cubicles. Small consumption and prolonged protective effect (starting from 2 weeks) allows reducing spending for household cleaning about in 5 times and downsize polluting of your home and surrounding environment by chemicals at least in 40 times when compared to traditional cleaners and detergents. When protective effect decreases, it is enough to reapply the product.

Easy to clean product CleverCLEAN justifies its name: cleaning becomes rarer, cleanliness can be achieved with minimal time, without using chemical and abrasive cleaners. For the most part it is enough to wipe surface with cloth. Composition of product is inert and contains no volatile matter.

CLEVERCLEAN FOR HOME is best solution.
Home easy to clean products set CleverCLEAN based on nanotechnology simplify the cleaning, save expenses and time, reduce home pollution by chemicals.

CleverCLEAN for home – universal set for complex household cleaning.

CleverCLEAN for home – cheaply and efficiently.

Product is packed in a convenient plastic bag, where you will find:

CleverCLEAN for home interior
CleverCLEAN for kitchen
CleverCLEAN for bathroom/WC
Two 30cm x 30cm cloths set: terry and polish

Extremely low consumption (3 -5 g/m2)
Useful time: 3 years from manufactured date (on bottle).

User manual:

Shake the bottle before use. Wet the terry cloth without excess by small quantity of the product.

Evenly distribute the product on dry surface by terry cloth. Wait 3-5 min. Remove exceed product by same terry cloth.

Polish the surface by plain cloth. Don't expose the surface by mechanical action about 1,5-2 hours.

Protective coating is fully ready in about 12 hours.

Nanoformula microfiber terrycloth and plain cloth are recommended for these products.
